ABOUT US

A company of lift specialists

SODILIFT is a Spanish company specialising in the design, supply and export of lifts, goods lifts and escalators, based in L'Hospitalet de Llobregat (Barcelona).

Our team has more than fifteen years of experience in the design, installation and maintenance of lifts.

You hand us your project; we see it through to the end. Bespoke design, manufacturing, packing, export documents, transport and tracking to your site, then installation by your own teams, the partner of your choice or our international network of installers.

WHAT WE DO

Five floors of expertise

Bespoke design

Shaft survey, choice of drive, performance and finishes: every lift is sized for your building.

Complete lifts for export

Machine-room-less and machine-room lifts, goods lifts and escalators, packed and shipped with all export documents.

Cabins & finishes

Six cabin models, dozens of finishes, a choice of car and landing operating panels.

Parts

Controller boards, drives, brakes, governors, displays: original spare parts shipped across Spain and abroad.

Projects in Spain

Study and supply of lifts for housing, offices and public buildings, installed by your lift company.

FROM A TO Z

One contact, from drawing to commissioning

01 **Bespoke design**
Your project starts with a drawing: your shaft, your floors, your use. Every lift is sized for your building.

02 **Component selection**
The best components, selected to meet your project's requirements, for better value for money.

03 **Preparation**
All your lift's components are prepared and packed in export crates, protected for a long, safe and damage-free journey.

04 **Loading**
Optimised loading to ship as many components as possible, in individual crates or in one or more containers.

05 **Transport**
To your destination, anywhere in the world, by road, by sea or both.

06 **Follow-up**
Every stage of the journey is tracked daily, until your goods arrive.

07 **At sea**
Your equipment is on its way to Europe, Africa or the Middle East, with all documents ready for customs clearance on arrival.

08 **Delivery**
We support you: everything is arranged for a safe delivery, as quickly as possible.

09 **Reception**
You receive your equipment on site, complete and checked, before installation.

10 **Installation**
By your teams, by the partner of your choice or by our international network of installers.

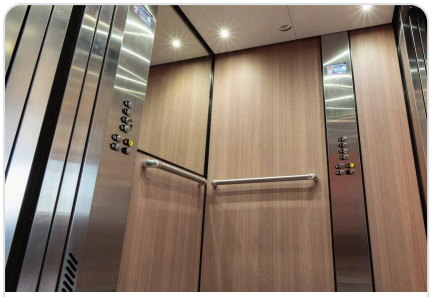

11 **Commissioning**
Tests and adjustments: the lift is ready.

12 **Everyday use**
For the people who ride it every day.

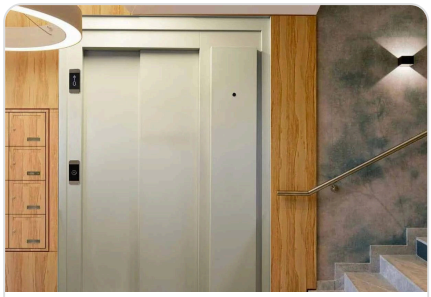

13 **Your project**
What if the next floor were yours?

Our lift ranges

Medium 2.5 range
A machine-room-less lift designed for buildings short on space: pit reduced to 300 mm and top floor at 2,500 mm, on a single load-bearing…

ALPHA Motion
Two loads, predefined dimensions and simplified installation: the standard residential lift of our range, for new and existing…

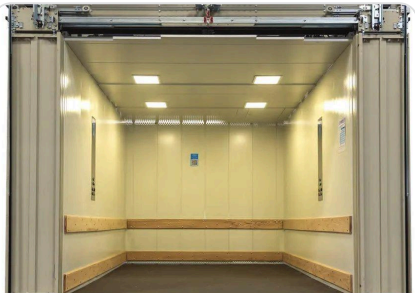

SweetLIFT home lift
The home lift of our range, for houses and villas: it fits without major works, with a 10 cm pit, and…

EXPORT ONLY

HYBRID
Simple, robust mechanics combined with QI Touch electronics: the best-value lift for volume projects, with or without a machine…

Megalift goods passenger lift
For heavy loads and large volumes: a range of goods lifts designed like a machine tool, electric or…

Car lift
Vertical transport of the vehicle with its driver and passengers, where space does not allow an access…

Our range

The SODILIFT range covers the machine, the controller and the safety components. The components of our lifts are designed and manufactured in Europe.

QI Touch · Controller
Multitasking system, CAN bus communication, Quick Install wiring and guided commissioning. Compliant with EN 81-20 and EN 81-50, ready for connected monitoring.

LIMAX · Absolute positioning
A sensor on the car roof and a coded magnetic tape in the shaft: the car position is always known, stops are accurate and the shaft has fewer parts.

Gearless · Drive
Gearless motor for lower noise and energy use, or a quiet geared machine when the building has a machine room.

INTERNATIONAL

Your lift project, worldwide

Developers, construction companies, installers: we support you from design to commissioning, in Europe, Africa and the Middle East, with a contact who speaks your language.

Bespoke design

Study of your drawings and shaft, choice of machine, performance and finishes for your building.

European equipment

Lifts from our range, with controllers and spare parts from leading European brands, selected and combined to suit your project, budget and lead times, and consolidated in Europe before shipping.

Packing and export documents

Export crates, optimised container loading, invoice, packing list, certificate of conformity and bank documents when needed.

Tracked shipping

By road, sea or both, tracked at every step to the port or to your site.

Installation

By your teams, by the partner of your choice or by our international network of installers.

Parts

Original parts shipped anywhere, for new lifts as well as maintenance.

Your project, step by step

01 **Study**
Review of your drawings and needs, advice on the equipment.

02 **Offer**
Detailed offer and proforma invoice.

03 **Manufacturing**
Made to measure, components consolidated in Europe.

04 **Shipping**
Packing, export documents, tracked transport to destination.

05 **Installation**
Installation by your teams, your partner or our network.

06 **Commissioning**
Adjustments and tests: the lift is ready.

European standards, adapted to your country

- **EN 81-20 and EN 81-50** : Construction and safety of new lifts, with certificate of conformity.
- **Directive 2014/33/EU** : The European framework for lifts and their safety components.
- **EN 81-70 and EN 81-28** : Accessibility, including for people with reduced mobility, and remote alarm linked to a rescue service.

IN SPAIN

Your lift project in Spain

Developers, social landlords, property managers, architects, companies: we support you from study to commissioning, with a single contact from start to finish.

Study and advice

Review of your drawings and building, choice of the most suitable equipment: with or without machine room, goods lift, escalator.

Bespoke design

Dimensions, load, speed, number of levels, car and finishes: each lift is designed for your project.

Complete supply

Complete lifts (machine, controller, safety and signalling), controllers and spare parts.

Installation and commissioning

Installed by your licensed lift company, with our drawings, documentation and technical support, in compliance with EN 81-20 and EN 81-50.

Who is it for?

Residential buildings · Offices · Public buildings · Retail · Industrial buildings
